

<b>AGISIT 19/20</b>	<b>ASSIGNMENT</b>	<b>Number:</b>	1
Assignment type (Preparation, Reading, Lab)		<b>Issue Date:</b>	October 20, 2019
Title of Assignment		<b>Due Date:</b>	October 20, 2019
Author:		<b>Revision:</b>	0.0

## 1 Introduction

The objective of this Lab assignment is to study and to gain a better understanding of something.

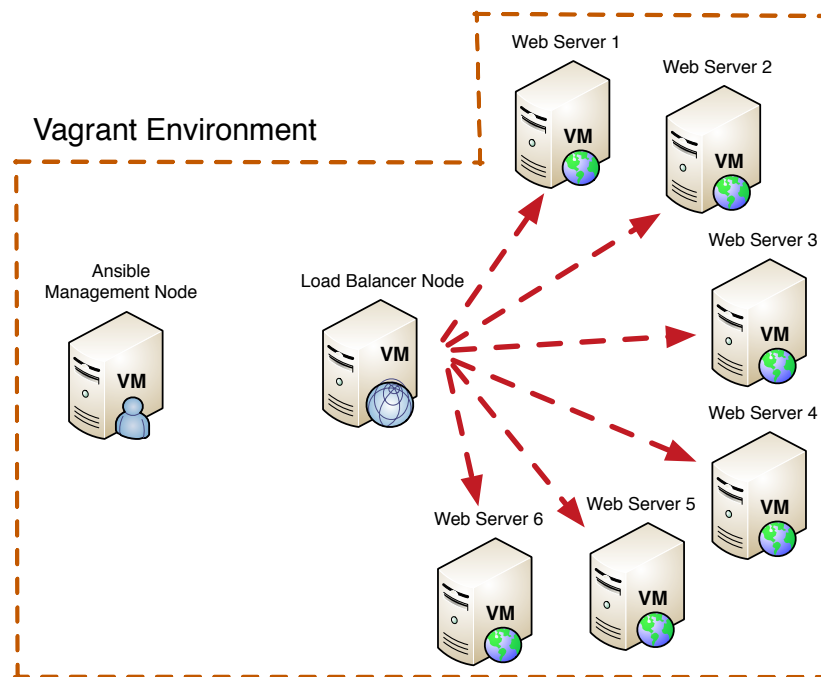

Figure 1: The Webfront Environment

## 2 How to do it?

One-line code formatting works with minted. For instance, a simple html sample like this:

```
<h2>Something <b>here</b></h2>
```

can be properly formatted.  
Bla bla.

```
#!/bin/sh
# removes backup files and TeX files
```

<b>AGISIT 19/20</b>	<b>ASSIGNMENT</b>	<b>Number:</b>	1

```
if [ $# -gt 0 ] && [ $1 = "-b" ]
then
    shift
    backups=false
else
    backups=true
fi
...

```

```
$ cd ~/containers/vagrant
$ mkdir jenkins-docker && cd jenkins-docker
$ vagrant init ubuntu/trusty64
$ vagrant up

```
